

# Audio/Visual Solutions

## Design and implementation

ColumbiaAVS™ has assembled a strong team of Certified Designers, Project Managers, Programmers and Implementation Engineers to design and deliver customized Audio/Visual solutions. ColumbiaAVS™ provides the right resources to walk customers through equipment preparation, delivery, installation and configuration.

In addition, ColumbiaAVS™ *Managed Services* proactively maintains, monitors and manages its customers' technology from the CAG 24/7 operations center, providing safeguards against critical downtime. As a result, Customers focus on their business, while ColumbiaAVS™ focuses on making their A/V work efficiently and intuitively.

### Additional A/V Assets:

- **Network designers and engineers** to assist with network design consulting
- **Network and system IT security** experts to assist in designing a security strategy for the A/V infrastructure
- **A/V design analysts** available to audit efficiencies of any third party's design
- **Training programs** for administrators, end-users and train-the-trainer
- **24/7 support**, Call Center, available 4 hr. on-site, next day on-site, managed services and maintenance programs
- **ISO 9001 QMS** (2018 certification)
