

Lifecycle Services

Assessment, planning, execution and support

Across a variety of industries and company sizes, CAG supports the ongoing Information Technology Lifecycle program from selection to acquisition to integration to operations/support to retirement of assets to the planning for succession, all in support of the business' objectives.

Lifecycle components include but are not limited to:

- Infrastructure - including connectivity
- Security
- Applications
- Voice
- Wireless
- Cloud
- Vendor management
- Governance
- Quality

Lifecycle Services is a continuum. CAG can be brought into any point along the lifecycle continuum, demonstrating immediate value through its breadth and experience. CAG will:

- Assess the environment and align with business requirements
- Recommend near- and long-term strategy
- Support the implementation and operations
- Assist with asset retirement and next generation planning

Lifecycle Services is supported by individuals or groupings of the following individual roles:

- Program Manager #
- Project Manager #
- Project Coordinator *
- Sr. Network Engineer #
- Network Engineer *
- Sr. Wireless Engineer #
- Wireless Engineer *
- Sr. Voice Engineer #
